Sortimo®
Intelligent Mobility

Vehicle equipment for professionals

– More than just a shelf!

Versatile & tailor-made for all needs

Our innovative solutions offer you maximum flexibility and order in your daily work. With Sortimo, you always have the right system at your fingertips to make work easier and increase efficiency. We design your vehicle equipment according to your ideas – for more productivity and less stress at work!

Jumbo unit – for optimum use of load space

The Jumbo Unit is a compact XL drawer, which is ideal for rapid and secure stowage of heavy equipment and bulky materials. Thanks to the robust telescopic rails, it is highly resilient. The large drawer front guarantees its ease of use and quick access to contents, even when wearing work gloves.

Depending on requirements, the Jumbo Unit can be used as an underfloor or stand-alone solution. The stand-alone version of the Jumbo Unit can either be equipped with a SoboGrip ProSafe topper or a covering tray. Jumbo Units of the same size can also be installed one above the other to create more storage space.

Multi-function pull-out – the heavy-duty pull-out with many functions

Thanks to load capacity of up to 200 kg, the multi-function pull-out from Sortimo can be used to take advantage of the loading space to the last angle. The Sortimo multi-functional pull-out element is ideal for use in light commercial vehicles or estate cars and can be used as a drawer or loading platform as required. The platform can be extended and locked up to 2/3 of its total length. This ensures easy access to the load even with a forklift or crane.

Smooth-running guides and castors on ball bearings ensure the platform can be conveniently operated even under maximum load. When closed, the loading platform is securely locked. The load can be secured with the combined ProSafe load securing system.

Floor/wall & ceiling cladding – for maximum load space protection

Floor and wall lining forms the basis of a professional vehicle conversion and makes a significant contribution to maintaining the value of a vehicle through its protective function. With vehicle-specific sets in different designs, Sortimo offers the right solution for every application.

Floor cladding SoboGrip

Sturdy installation floor with non-slip coating for alternating types of load.

Wall cladding SowaFlex

- protects the vehicle from the inside against damage
- impact and scratch-resistant
- Tailor-made for the vehicle
- moisture and chemically resistant
- 60% lighter than wood
- 100% recyclable honeycomb material

ProSafe – Professional load securing

The integrated ProSafe load securing lashing system allows the professional and legally compliant securing of loads. It offers a holistic system that extends from the base plate to the roof rack and is compatible with the original lashing points of the vehicle manufacturers.

TopSystem – Flexible roof racks for vans

With a sophisticated design, the Sortimo TopSystem creates additional storage space and enables effortless transport of even long and bulky goods. Easy handling saves time and facilitates ergonomic loading and unloading. In addition, the TopSystem can be flexibly used and expanded with extensive accessories to meet individual needs.

Electrical expertise – Energy supply in the vehicle

The Sortimo electrical accessories ensure reliable power and lighting on the go, so you can work efficiently wherever you are. With products such as inverters, lighting and power distribution units, you always create optimal and safe conditions.

WorkMo – Mobile Workstation

Thanks to its modularity, the Sortimo WorkMo can be individually assembled and can therefore be used in every conceivable situation: As a workshop trolley, workshop shelf, means of transport as well as a mobile workstation or workbench.

ProClick – Endless possibilities with just one click

The ProClick system can be used in a variety of ways, as the tool bags can be attached to both the ProClick Holder and Sortimo ProSafe punches. As a result, ProClick products are also suitable as accessories for vehicle equipment such as the SR5 side profile or the Globelyst ProSafe posts.

Our Sortimo BOXXes & Suitcases family

No matter if it's the smallest consumables, screwdrivers or cartridges – there is the right BOXX or the right case for every content. Tools and small parts are well organized, safely stowed and gently transported from the workshop to the place of use. The Sortimo BOXXes and suitcases improve organization and productivity in everyday work.
